FOR IMMEDIATE RELEASE

OneCommute and iCabbi join forces to provide Ride Home Programs

Alpharetta, GA, August 2023

OneCommute, a leading provider of commuter platforms, is thrilled to announce its strategic partnership with iCabbi, an innovative transportation booking and dispatch technology company. Together, they are set to introduce a new and automated Ride Home Program designed to streamline the provision of alternative and sustainable transportation solutions for companies and their employees.

The OneCommute Ride Home Program, in conjunction with iCabbi, will simplify the implementation of Ride Home Programs for Transportation Management Associations (TMAs), Metropolitan Planning Organizations (MPOs), and Property Operators. Historically, these programs have been characterized by their complexity and high costs.

This new innovative Ride Home program actively encourages commuters to opt for alternate transportation options such as transit, carpools, and vanpools. The driving force behind this shift is the assurance of a dependable Guaranteed Ride Home in case of emergencies. Moreover, this service can be accessed through a user-friendly mobile application.

The collaboration between OneCommute and iCabbi brings benefits not only to commuters but also to employers. It allows employers to provide a value-added commute benefit while decreasing operational expenses, simplifying processes, and minimizing manual efforts. This easy-to-use solution equips organizations with a hassle-free tool to increase participation in alternative commutes and promotes sustainable commuting.

"OneCommute is excited to partner with iCabbi to transform Ride Home programs across the nation," said Steve Wheeler, CEO of OneCommute. "Our Program helps employers, employees, and the environment. Our innovations and partnerships with key transportation industry players are revolutionizing commuting and Driving Change OneCommute at a Time!"

About OneCommute: OneCommute is a leading provider of transportation solutions, offering innovative platforms and services that promote sustainable commuting and reduce traffic congestion. Through cutting-edge technology and user-friendly interfaces, OneCommute

empowers commuters to make informed transportation decisions, contributing to a cleaner and more connected community.

About iCabbi: iCabbi is a leading transportation technology company providing dispatch software solutions to the taxi and private hire industry. Their innovative platform enables businesses to streamline operations, enhance customer experience, and drive growth through automation and digitalization. iCabbi is part of the Mobilize ecosystem, which gathers all the mobility and energy-related services of Renault Group.
